Block 12

Thank you for participating in this survey. Please read the instructions carefully, there will be two tasks and a short survey. To ensure data quality, participants who do not

pass the attention checks will not be eligible for compensation.

study_introduction

In the first task, you will be paired anonymously with another participant. You have been given 10 points. The other participant starts with 0 points. You must decide how many of your 10 points to give to the other participant.

- You may give any whole number of points from 0 to 10.
- Points you give to the other participant will be added to their total.
- Points you keep will remain with you.
- The other participant has no decision to make and cannot affect the outcome.
- Your decision is final.
- Your choice will not be shared with the other participant.

After the survey is complete, participants will be randomly selected to receive additional compensation. If you are selected, your payment will be determined by this task. Specifically, you may be paid based on your own decision

(the points you chose to keep for yourself) or based on another participant's decision (the points they allocated to you). Each point is worth $1.

Dictator Game

Please decide how much of the 10 points you would like to give to the other participant and how much you would like to keep for yourself.

The total must add up to 10.
